

## GOING GREEN?

Energy Efficiency is the best way for owners to show their commitment to the environment, reduce operating costs and achieve LEED or Energy Star status.

### Some of the value added benefits of Energy Efficiency can include:

- Return on investment of 1–5 years typical
- Implement capital improvement without capital expenditure
- Increased building value
- Increased lease value
- Improved worker productivity
- Improved building efficiency

In addition to lowering the impact on the environment, reducing your carbon footprint and reducing your operating costs; energy efficiency projects may qualify for additional rebates, tax credits and incentives.

## PLATINUM E<sup>2</sup> (Energy Efficiency) systems

### ENERGY EFFICIENCY

A Platinum E<sup>2</sup> System is an excellent way to increase your energy efficiency.

Platinum E<sup>2</sup> Systems can include roofing, daylighting, lighting upgrades, insulation upgrades, window upgrades and solar. Your building is a complete system and should be considered as such. Platinum works with you to examine all the possible energy upgrades to create the best possible Return On Investment for you and reduce your existing consumption to pay for improvements you want.
