

PLATINUM (Energy Efficiency) systems

LIGHTING

Implementing a Platinum E² System lighting plan is an excellent way to save on energy costs and to upgrade your existing lighting.

Upgrading your existing lighting system is an excellent way to capture the low hanging fruit of energy savings. Platinum works with you to upgrade your lighting system to provide superior more cost effective lighting. New lighting technologies enable buildings to reduce their lighting energy bills up to 70% while increasing the available light.

GOING GREEN?

Lighting, is a fantastic way to improve a buildings energy efficiency, improve occupant productivity and reduce operating costs.

Some of the value added benefits of Lighting can include:

- Return on investment of 1–10 years typical
- Decreased heating and cooling costs
- Increased building health
- Improved building efficiency
- Improved worker productivity

In addition to lowering the impact on the environment, reducing your carbon footprint and reducing your operating costs; lighting may qualify for additional rebates, tax credits and incentives.
