

GOING GREEN?

Roofing, is one of the top energy efficiency projects for owners to demonstrate their commitment to the environment, reduce operating costs and achieve LEED or Energy Star status.

Some of the value added benefits of Roofing can include:

- Return on investment of 1–10 years typical
- Decreased heating and cooling costs
- Reduced HVAC maintenance and repairs
- Increased building health
- Improved building efficiency
- Improved worker productivity

In addition to lowering the impact on the environment, reducing your carbon footprint and reducing your operating costs; roofing may qualify for additional rebates, tax credits and incentives.

PLATINUM (Energy Efficiency) systems

ROOFING

A Platinum E² System always includes energy efficient roofing options.

As a pioneer in "cool roofing" Platinum knows installing an energy efficient roof system is more than just putting on a white roof. We are certified with all major manufacturers and utilize the latest in sustainable roofing products and practices. Platinum works with you to create a roof system within your budget that will put money back in your pocket month after month.

"Roofing isn't about just stopping leaks, it's about maximizing your energy efficiency"
