

PLATINUM (Energy Efficiency) systems

SOLAR

Implementing a Platinum E² System can include solar and is an excellent way to reduce your carbon footprint.

GOING GREEN?

Solar is one of the best ways to create a long term budget for your energy, reduce operating costs and achieve LEED or Energy Star status.

Some of the value added benefits of Solar can include:

- Return on investment of 1–10 years typical
- Energy independence
- Ability to budget long term energy costs
- Increased roof life span
- Decreased heating and cooling costs
- Improved building efficiency

In addition to lowering the impact on the environment, reducing your carbon footprint and reducing your operating costs; solar may qualify for additional rebates, tax credits and incentives.

As part of your building energy upgrade solar is often considered. Platinum can develop a turnkey energy production solar array for your building or can work with your existing solar integrator. Platinum knows your roofing system protects your investment and we work with the solar to insure a seamless installation. Platinum is certified with all major roof manufacturers and has relationships with most major solar manufacturers. This allows Platinum to make sure your solar is installed to all manufacturer requirements maintaining your roof warranty and maximizing your solar production. Call Platinum today regarding your Solar project.
