

GOING GREEN?

Window upgrades are a great way to improve a building's energy efficiency, improve occupant productivity and reduce operating costs.

Some of the value added benefits of Windows include:

- Return on investment of 1–10 years typical
- Decreased heating and cooling costs
- Reduced HVAC maintenance and repairs
- Decreased noise from outside
- Increased interior life span
- Increased building health
- Improved building efficiency
- Improved worker productivity

In addition to lowering the impact on the environment, reducing your carbon footprint and reducing your operating costs; windows may qualify for additional rebates, tax credits and incentives.

PLATINUM (Energy Efficiency) systems

WINDOWS

Platinum E² System
Window upgrades increase the value of your building, reduce noise transmission and pay for themselves through energy savings.

Platinum provides the latest in window technologies to upgrade your existing windows to create a more efficient design. Windows can be a large part of the energy envelope and account for a major portion of energy use or savings. Platinum works with you to develop a window retrofit program based upon your building's energy usage and orientation. Call today to find out how to upgrade your window systems with Platinum.
